

Verification **CHAINED**

AI CHAINED WITH BLOCKS

-AMAN INDIA

UNDERSTANDING GAP

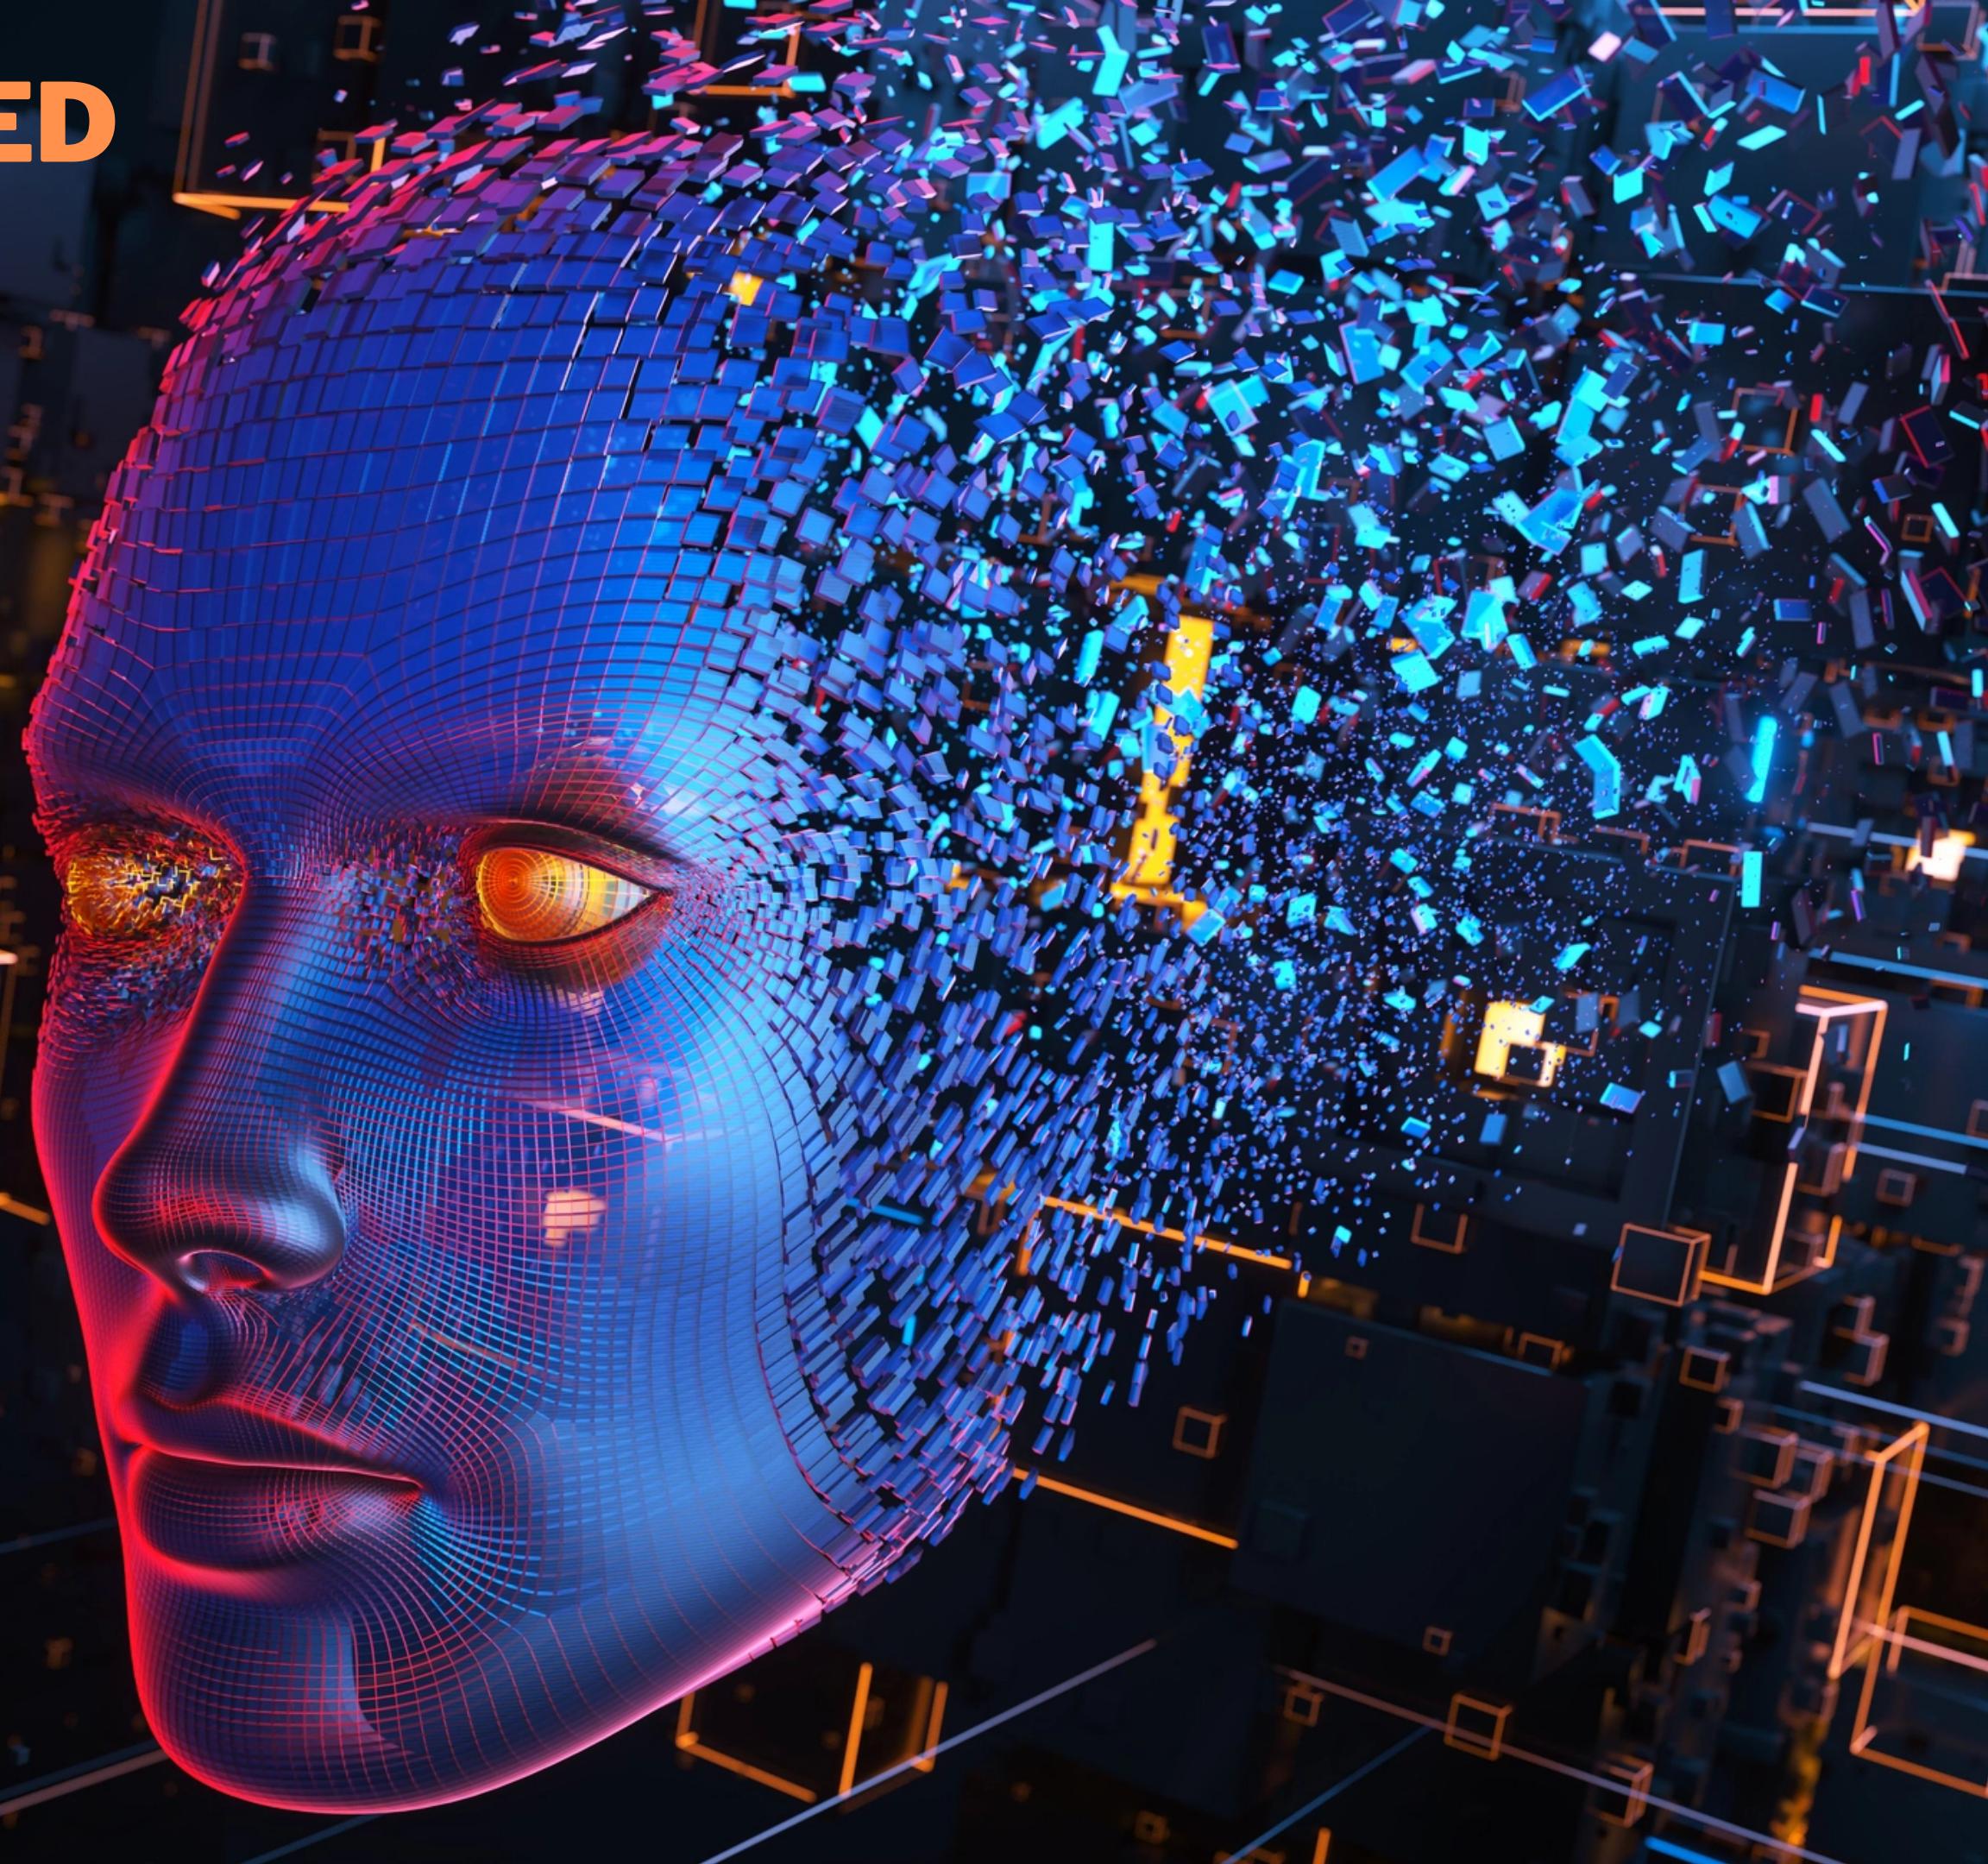

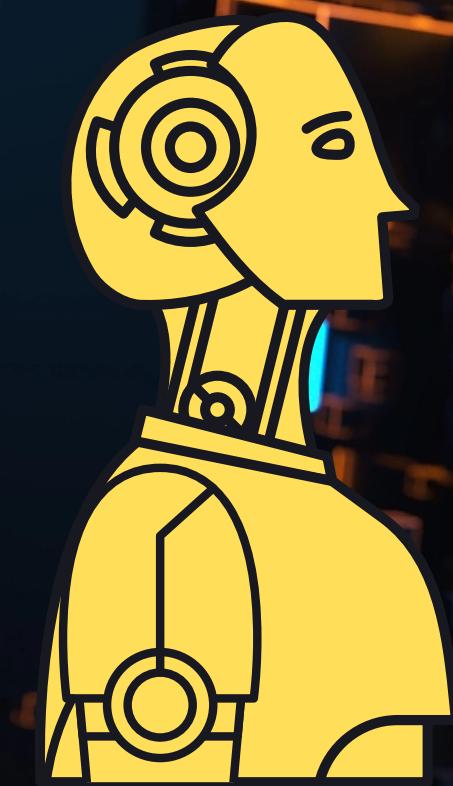

Problem Statement

- Hollow Pillar of Information Security (**Integrity**)
- Absence of Decentralized Validation Platform
- Scattered Databases and Tracking Market with Issues of Availability and Trustworthiness
- New era but still Old school Technology (AI)

VERIFICATION CHAINED

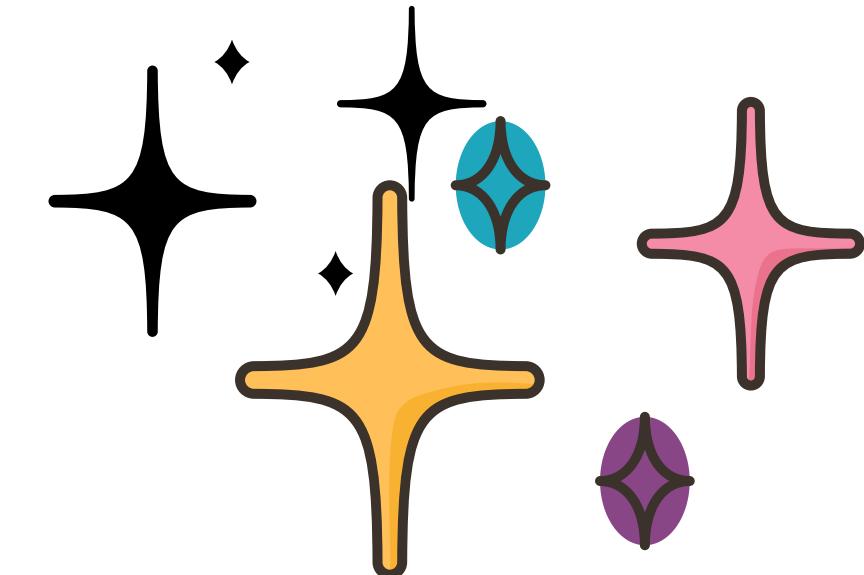

**Fusion of AI and
Blockchain**

SOLUTION

Verification Chained

01

Integrity (Trustworthiness)

With the power of Blockchain *Nearly Impossible to Hack*, "Promise Chained" Come out clean on the Principal of Information Security.

03

Security of Blockchain - Magic of A

With the Magic of Artificial Intelligence and the Security of Blockchain, "Promise Chained" stands out.

Features like Document Parsing (Computer Vision + NLP) makes the platform futuristic.

02

One Stop Decentralized Authorization Platform

Decentralized One-stop platform for Validation,
Tracking, and Legal Documentation.
Round-the-clock availability, 99.99% Trustworthy,
Upfront with Technological advancement

04

Breaks Stereotypes with a move

"Promise chained" breaks traditional ways of a validation methodology with advanced technology in the market. Implementation of predictions added with tracking makes it Ideal. It's a diamond in the Gold mine.
